DETAILED ACTION

This application is a 371 of PCT/EP04/10661 09/23/2004

Claims 1-10, 12-14, 22-34 are before the Examiner and subject to the following:

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group 1, claim(s) 5-8, 12 drawn to compounds and compositions containing compounds of the given formulae.

Group 19, claim(s) 22-23, drawn to microorganism that is capable of producing compounds of Group I.

Group 21, claim(s) 22-24, drawn to microorganism that is AB 18-032 (DSM 15899).

Group 2, claim(s) 1,12 drawn to compounds other than compounds of Group 1 produced by bacterial genus Verrucosispora.

Group 3, claim(s) 2, 12 drawn to compound other than compounds of Group I exhibiting pharmacological effect.

Art Unit: 1625

Group 4, claim(s) 3,12 drawn to compound other than compounds of Group I exhibiting antibiotic effect.

Group 5, claim(s) 4, 12 drawn to compounds other than compounds of Group I produced by bacterial strain AB 18-032 (DSM 15899).

Group 6, claim(s) 10, 12 drawn to compounds other than compounds of Group I with Michael system.

Group 7-12, claim(s) 9, 12,13, drawn to pharmaceutical compositions of containing compounds of corresponding compounds/composition of Groups 1-6 that inhibit synthesis of paba.

Group 13-18, claim(s) 14, 27-33, drawn to method of treating diseases by administering compounds/compositions of Groups 1-6.

Group 20, claim(s) 22-23, drawn to microorganism that is capable of producing compounds other than compounds of Group I.

Group 22, claim(s) 25-26, drawn to process of preparing a substance culturing microorganisms of Group 19.

Group 23, claim(s) 25-26, drawn to process of preparing a substance culturing microorganisms of Group 20.

Group 23, claim(s) 25-26, drawn to process of preparing a substance culturing microorganisms of Group 21.

Group 24, claim(s) 34, drawn to microorganism other than the microorganism of Group 21.

Art Unit: 1625

The inventions listed as Groups 1-24 do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the special technical present in groups 1-24 is/are not contribution(s) over the prior art. See Reidlinger et al. The Journal of Antibiotics, 57(4), 271-279, 2004 and Bister et al, Angew. Chem, Int. Ed. 43, 2574-2576, 2004, wherein the microorganism and the compounds of the present formula are disclosed.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

The examiner has required restriction between product and process claims. Where applicant elects claims directed to the product, and the product claims are subsequently found allowable, withdrawn process claims that depend from or otherwise require all the limitations of the allowable product claim will be considered for rejoinder. All claims directed to a nonelected process invention must require all the limitations of an allowable product claim for that process invention to be rejoined.

In the event of rejoinder, the requirement for restriction between the product claims and the rejoined process claims will be withdrawn, and the rejoined process claims will be fully examined for patentability in accordance with 37 CFR 1.104. Thus, to be allowable, the rejoined claims must meet all criteria for patentability including the requirements of 35 U.S.C. 101, 102, 103 and 112. Until all claims to the elected product are found allowable, an otherwise proper restriction requirement between product claims and process claims may be maintained. Withdrawn process claims that are not commensurate in scope with an allowable product claim will not be rejoined. See MPEP § 821.04(b). Additionally, in order to retain the right to rejoinder in accordance with the above policy, applicant is advised that the process claims should be amended during prosecution to require the limitations of the product claims. **Failure to do so may result in a loss of the right to rejoinder.** Further, note that the prohibition against double patenting rejections of 35 U.S.C. 121 does not apply where the restriction requirement is withdrawn by the examiner before the patent issues. See MPEP § 804.01.
